DOUBTS

1. If we want one LED in **active-high** way (**Initially OFF**), we would do:

   DDRB = DDRB | (1 <<LED)
   PORTB = PORTB &~ (1<<LED)

   Right?

2. If we want one LED in **active-high** way (**Initially ON**), we would do:

   DDRB = DDRB | (1 <<LED)
   PORTB = PORTB | (1<<LED)

   Right?

3. If we want one LED in **active-low** way (**Initially OFF**), we would do:

   DDRB = DDRB | (1 <<LED)
   PORTB = PORTB | (1<<LED)

   Right?

4. If we want one LED in **active-low** way (**Initially ON**), we would do:

   DDRB = DDRB | (1 <<LED)
   PORTB = PORTB &~ (1<<LED)

   Right?

5. With this lines, we would configure push-button in **active-low** way and **active-high** way, respectively:

   DDRB = DDRB &~ (1 <<BTN)   DDRB = DDRB &~ (1 <<BTN)
   PORTB = PORTB | (1<<BTN)   PORTB = PORTB &~ (1<<BTN)

   Right?
